

# CLEANING CLEANROOM SURFACES USING A DOUBLE BUCKET SYSTEM

## DOUBLE BUCKET SYSTEM

- 1. Cleaning Solution Bucket** – Add or mix the cleaning solution to the first bucket and fully saturate the mop cover in the solution.
- 2. Waste Bucket** – Using the wringer, located over the waste bucket, wring the excess cleaning solution from the mop into the waste bucket - the second bucket.
- 3. Mop** – Apply the cleaning solution to the surface using your company's Standard Operating Procedure (SOP) for mopping.
- 4. Waste Bucket** – Using the wringer, wring the mop and waste water into the waste bucket for the second time. This process can be repeated multiple times until your surfaces are cleaned. \*

\* The cleaning solution and mop cover should be changed when they are visibly dirty or show evidence of debris.
